MINICAR APPLICATION FILTERS PROGRAM

Le Minicar, conosciute anche come Microcar o City car, sono veicoli compatti progettati per la mobilità urbana. Caratterizzate da dimensioni ridotte e motori di piccola cilindrata, queste vetture offrono un'alternativa pratica ed economica rispetto alle automobili tradizionali.

Le Minicar sono progettate per essere estremamente compatte, il che le rende perfette per la circolazione nelle città affollate. Sono generalmente lunghe meno di 3,5 metri e possono ospitare comodamente due passeggeri, sebbene alcune versioni abbiano una configurazione a quattro posti. Vista la grande diffusione negli ultimi anni, noi di **TECNECOFILTRATION** abbiamo sviluppato un apposito programma che comprende filtri aria, filtri olio e filtri carburante a copertura dell'intero parco circolante, tutti di qualità originale, nel rispetto degli standard richiesti dalle case automobilistiche ed in conformità con la normativa CE 461/2010.

Minicars, also known as Microcars or City cars, are compact vehicles designed for urban mobility. Characterized by small dimensions and small displacement engines, these cars offer a practical and economical alternative to traditional cars.

Minicars are designed to be extremely compact, making them perfect for getting around busy cities. They are generally less than 3.5 meters long and can comfortably seat two passengers, although some versions have a four-seat configuration. Following the great diffusion in recent years, we at **TECNECOFILTRATION** have developed a special program that includes air filters, oil filters and fuel filters to cover the entire fleet on the road, all of original quality, in compliance with the standards required by car manufacturers and in compliance with the CE 461/2010 regulation.
