

AUGER: Superior Parts from a Leading Global Manufacturer

As one of the largest spare-parts brands for heavy-duty commercial vehicles we design, test and produce every component in our 215,000 m² factory complex. Our integrated R&D centre spans 3,000 m² and employs over 300 scientists and technicians across five specialised divisions. We use German precision and cutting-edge processes in rubber compounding and metallurgy. Each part meets or exceeds all international technical quality certificates.

Discover the Power of Choice

Choose from over 60,000 engineered products in 24 distinct categories. We cover suspension systems, steering components, engine and clutch systems, and more. Each item undergoes rigorous testing to the highest quality standards. Our in-depth engineering expertise drives constant innovation.

Power of Manufacturing & Innovation

We pioneer new materials, processes and technologies from design through delivery. We are the sole manufacturer to produce all components in-house. This total control ensures
